Cleveland Technical Societies Council Honors the Leadership of NSL Analytical President

May 28, 2014 (Cleveland, OH) — FOR IMMEDIATE RELEASE

Larry Somrack, President of NSL Analytical Services, Inc. was presented The Robert B. Cummings Distinguished Leadership Award at the CTSC's 68th Annual Scholarship and Achievement Awards Banquet. The dinner and awards ceremony was held at the Windows on the River in Flats on May 5, 2014.

The Robert B. Cummings Distinguished Leadership Award is bestowed annually upon an individual who is or has been closely associated with engineering or technical work, and who has contributed greatly to the advancement and welfare of the engineering or technical professions. The individual must have achieved true and lasting prominence over a period of years, and must also have shown community spirit and leadership in worthy non-professional activities.

This award is presented to one individual each year by the **Cleveland Technical Societies Council** who represents more than 20 professional societies and organizations that serve the scientific, technical, engineering and education professions in Northeast Ohio. In addition, the council provides scholarships to outstanding high school students.

"It is a great honor to be recognized for such a distinguished award," said Somrack. "It takes a great team of people to embrace the vision for a company by it's leader and then make that vision a reality. Our vision has been to be a world class laboratory delivering mission critical information to our customers."

About NSL Analytical Services, Inc.

In business for almost seven decades, NSL Analytical Services, Inc. is a fully accredited Independent Commercial Testing Laboratory. NSL is certified as an ISO/IEC 17025 laboratory, Nadcap (Aerospace) Materials Testing Laboratory, 10 CFR 50 Appendix B (Nuclear) compliant laboratory and approved by many major companies. NSL Analytical helps customers achieve the highest standards of product quality from product design to launch by providing accurate, reliable and repeatable materials testing results.
