NSL Analytical Launches Powder360 at the RAPID + TCT Show in Detroit

Cleveland, Ohio – NSL Analytical is exhibiting at the upcoming RAPID + TCT Show in Detroit, Michigan. [RAPID + TCT](#) provides an opportunity for the entire additive manufacturing industry to come together in the interest of sharing knowledge and ideas for innovation.

This year, NSL Analytical will be launching Powder360. Powder360 is the complete, all-in-one package for every additive manufacturer’s powder characterization needs and provides confidence in powder characterization through alloy and process development, powder qualification, and recycle for reuse.

From May 21-23, attendees can find [NSL Analytical](#) at Booth #1473 of the Cobo Center in Detroit, Michigan. The team will be standing by to answer questions about material testing and will be presenting information on their new service.

In addition to the Powder360 suite of tests, NSL provides support by offering tests ala carte for the additive manufacturing industry, such as applications for feedstock, prototype designs and final products. Comprehensive additive materials testing services include:

- Material Composition — chemical analysis of major and trace level elements for R&D and specification conformance
- Powder Characterization — flow rate, density, particle size distribution and particle shape
- Validation of Metal Printed Parts — metallurgical analysis, mechanical testing, microstructure and failure analysis

About RAPID + TCT

The RAPID + TCT conference is known worldwide as North America’s most influential and respected technical conference on additive manufacturing. At the 2019 conference, over 150 experts will speak on the latest processes, applications, materials and research in 3D printing, additive manufacturing, 3D scanning, CAD/CAE, metrology and inspection, and related technologies.

About NSL Analytical

NSL Analytical is an ISO/IEC 17025 and Nadcap accredited material testing laboratory that provides accurate and repeatable results with consistent turnaround times to customers around the world. Since 1945, NSL has helped to verify the highest quality, performance, and safety standards in product materials through comprehensive testing services. Customers in the aerospace and defense, power generation, oil and gas, transportation, and medical industries trust their most critical materials testing needs to NSL Analytical.
