NSL Analytical President Larry Somrack Inducted as an ASM Trustee

October, 2018 - Cleveland, Ohio: Cleveland, Ohio – President of NSL Analytical, Larry Somrack, has been selected to serve on the 2018-2019 ASM International Board of Trustees. Formerly known as the American Society for Metals, ASM International is an organization that encourages professional development and improved materials performance by providing important reference resources and training to materials scientists and engineers.

Somrack was officially inducted into office at ASM's Annual Meeting on October 15, 2018. A formal awards banquet was also held to welcome all newly elected officials and trustees. As a Trustee, Somrack is charged with acting in the best interests of the society's membership and helping to lead the governance and strategic director of the society. He will serve a three-year term along with the other newly elected officials.

Somrack looks forward to serving his term on the Board of Trustees and appreciates the opportunity to help further advance the culture and impact of ASM International.

About ASM International

[ASM International](#) connects materials professionals and their organizations to the resources necessary to provide professional development and to improve materials performance. As the world's largest and most established materials information society, ASM engages members through a global network of peers and provides access to trusted materials information through reference content and data, education courses, international events, and applied research.
