**NSL Analytical Services, Inc. announces the retirement of two longtime employees**

May 15, 2014 (Cleveland, OH) - NSL Analytical Services, Inc. announced the retirement of two long time employees: Vera Hain with 43 years of service and Daniel Witucky with 34 years of service.

Vera Hain joined NSL in 1971 when NSL Analytical Services, Inc. was National Spectrographic Labs located on Miles Road. Mrs. Hain began her career reading Spectrographic plates. This required her to chemically develop the plates and then read the spectrographic lines on glass plates. This experience gave her the opportunity to achieve the technical specialist status at NSL. She enjoyed teaching chemists the fundamentals of chemistry and had a lifelong joy of learning. Mrs. Hain was honored at a company luncheon on April 29, 2014. In attendance were many former employees and Ms. Barbara Walker, Chief of Staff for the City of Warrensville Heights. Standing in for Mayor Brad Sellers, Ms. Walker presented Mrs. Hain with a proclamation from the City of Warrensville Heights recognizing her for the contributions made to NSL and declaring April 30, 2014 "Vera Hain Day."

Daniel Witucky joined NSL in 2009 when NSL acquired Central Testing. Mr. Witucky worked under 3 different owners at Central Testing during his 34 years in mechanical testing. He enjoyed teaching others and sharing his expertise in mechanical testing and heat treating of samples. Mr. Witucky was honored at a luncheon on February 28, 2014.

"I would like to personally thank Vera and Dan for their many contributions to make NSL Analytical Services and NSL Central Testing (now NSL Metallurgical), a great place to work and grow into a leader in the commercial testing market." said Larry Somrack, president of NSL Analytical. "They have both been integral to the success of NSL Analytical through their leadership and commitment to the company. We wish them well in their new endeavors."

**About NSL Analytical Services, Inc.**

A recognized leader in analytical testing, NSL Analytical Services, Inc. is an **Independent Commercial Testing Laboratory specializing in Inorganic Elemental Chemical Analysis, Metallurgical and Microscopy Evaluations and Polymer Materials Testing**. NSL Analytical helps customers achieve the highest standards of product quality from design to launch by providing accurate, reliable and repeatable materials testing results.
