**NSL Analytical Received its ISO/IEC 17025 Certification Renewal for both its Metallurgical Laboratory and Analytical Laboratory.**

NSL Analytical Services, Inc., an independent commercial testing laboratory, received renewed accreditation for ISO/IEC 17025, a prestigious designation for the quality and competence of its services. "This accreditation recognizes the testing competence of NSL in everything we do," said Larry Somrack, president. "NSL has been ISO/IEC 17025 accredited since 1999. Our commitment to quality and continuous improvement has made it possible to maintain our accreditation to ISO/IEC 17025."

Renewed accreditation certificates from ACLASS, the ILAC-approved accreditation body for NSL, are now available for download from the NSL Analytical website.

**What is ISO/IEC 17025?** ISO/IEC 17025 was first issued in 1999 by the International Organization for Standardization (ISO) and the International Electrotechnical Commission (IEC). It is the single most important standard for calibration and testing laboratories around the world. Laboratories that are accredited to this international standard have demonstrated that they are technically competent and able to produce precise and accurate test and/or calibration data.

This accreditation is a voluntary, third party-reviewed process. As part of accreditation, a laboratory's quality management system (QMS) is thoroughly evaluated and all accredited tests are observed by an auditor on a regular basis to ensure continued technical competence and compliance with ISO/IEC 17025. A copy of NSL's QMS is available by requesting it at
